Summary

Final-year Computer Science student (graduating 2027) seeking a **Software Engineering / Java Developer Internship**. Hands-on experience with Java, Spring Boot, and REST APIs through a part-time trainee role and two full-stack projects covering authentication, database optimization, and Docker deployment. Solved 250+ DSA problems on LeetCode. Quick learner, comfortable working with senior engineers, and eager to contribute to real production systems.

Education

Dr. APJ Abdul Kalam Technical University

B.Tech in Computer Science and Engineering — **CGPA: 7.85**

2023 – 2027

Lucknow, India

Technical Skills

Languages: Java (OOP, Collections, Multithreading, Generics), JavaScript, SQL, C

Backend: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, REST APIs, Servlets, JDBC, Microservices

Databases: MySQL, PostgreSQL, Oracle DB, MongoDB, Query Optimization, Hibernate ORM

DevOps & Tools: Docker, Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Swagger/OpenAPI

DSA & CS Concepts: Arrays, Trees, Graphs, Dynamic Programming, OS, DBMS, Computer Networks

Web & Others: HTML5, CSS3, React.js, JWT Authentication, Agile/Scrum

Experience

ByteCode IT Solutions

Sep 2025 – Present

Java Developer Trainee (Part-time, alongside studies)

Kanpur, India

- Built and maintained backend services in Core Java and Servlets, applying connection pooling and query optimization to reduce average API response time.
- Integrated JDBC with Oracle Database and helped optimize 20+ SQL queries used in core data-retrieval workflows, working directly with senior engineers on query plans and indexing.
- Implemented multithreading and structured exception-handling to improve service stability under load.

Projects

E-Commerce Web Application — Spring Boot, Spring MVC, Hibernate, MySQL, React.js

GitHub

- Built a full-stack E-Commerce platform with user registration, JWT authentication, product catalog, dynamic cart, and end-to-end order management; verified stability under simulated concurrent-user load testing.
- Designed and exposed **15+ RESTful APIs** using Spring Boot and Spring MVC with clean separation of concerns (controller/service/repository layers); implemented role-based access control via Spring Security for admin, seller, and customer roles.
- Optimized Hibernate ORM mappings and tuned MySQL queries to improve average DB response time under concurrent transactions.
- Integrated Maven for build automation and Postman for API testing, with strong test coverage across critical endpoints before deployment.

AI Resume Analyzer — Spring Boot, PostgreSQL, Docker, NLP

GitHub

- Built a Resume Analyzer that parses resumes, extracts key skills and experience, and scores ATS compatibility against job descriptions.
- Designed **10+ RESTful APIs** for resume ingestion, NLP-based skill extraction, keyword matching, and a multi-stage scoring pipeline, documented with Swagger/OpenAPI.
- Designed a normalized PostgreSQL schema for resumes, job profiles, and match results to support fast lookups and analytics.
- Containerized the application with Docker multi-stage builds, streamlining dev/production environment setup.

Certifications

- DSA in Java — Coding Blocks 2025
- Full Stack with Java — ByteCode IT Solutions 2026
- System Design — Coding Blocks 2026

Extracurricular & Achievements

- Solved **250+ DSA problems** on LeetCode across Arrays, Linked Lists, Trees, Graphs, and Dynamic Programming; consistently ranked in the **top 30%** on weekly contests.
- Served as **Volleyball Team Captain**, leading a team of **12 players** in inter-collegiate tournaments — developed leadership, team coordination, and strategic decision-making skills under pressure.
